EDUCATION

B.Tech(Computer Science & Engineering)

Vivekananda Global University

06/2022 - 06/2026,

Senior Secondary (Class XII – RBSE)

DAV, Bhadra, Hanumangarh

2022

EXPERIENCE

Kvon Tech Consultancy (Jan 2026 – Apr 2026)

- Developed a responsive frontend for a CSV-based certificate generation system with structured file upload, validation, and dynamic data rendering.
- Collaborated on admin dashboard development, API integration, and error handling to ensure smooth workflow and reliable user experience.
- Built certificate preview and PDF generation features by integrating APIs for email delivery and QR code-based certificate verification.

PERSONAL PROJECTS

AI Learning Platform (Full Stack + AI Integration)

- Developed a responsive and scalable user interface using React.js, ensuring a smooth learning experience across desktop and mobile devices.
- Integrated frontend with Google Gemini AI APIs to implement AI chat, document summarization, concept explanation, flashcard, and quiz features.
- Built secure authentication, document upload, and document viewer interfaces while managing API integration, state, and error handling for a seamless user experience.

Smart Tourist Safety Monitoring System

- Developed responsive React.js interfaces for live tracking, geofencing, and SOS alert features, ensuring a smooth user experience across devices.
- Integrated frontend components with backend APIs to display real-time location data and manage secure authentication workflows.
- Designed and optimized reusable UI components, improving responsiveness, performance, and overall application usability.

Expense Tracker website

- Developed a responsive expense management application using React.js, enabling users to efficiently create, update, delete, and monitor daily expenses through an intuitive interface.
- Integrated Firebase Authentication and REST APIs to implement secure user authentication, real-time data synchronization, and reliable expense management.
- Architected reusable React components with Redux Toolkit and React Router, enhancing state management, application performance, and overall user experience.
